**MAMMOTH® LIGHT COMMERCIAL RECOGNIZED IN
2017 ACHR NEWS DEALER DESIGN AWARDS**

R7TQ is a bronze winner in the HVAC light commercial equipment category.

St. Louis, July 31, 2017 – The Mammoth Light Commercial R7TQ gas/electric packaged system was named a bronze winner in the HVAC light commercial equipment category of the 14th Annual Dealer Design Awards Program sponsored by *The Air Conditioning Heating & Refrigeration News* magazine. The R7TQ was recognized because of its direct-fit replacement capabilities and high value.

“These awards give us a unique opportunity to recognize the outstanding research and development efforts that go into many of the products serving the HVACR industry, and the awards issue gives our readers an opportunity to read about innovative installation and service solutions,” said Mike Murphy, publisher at *The ACHR News*.

Winners in the 14th annual Dealer Design Awards were selected from 81 entries by an independent panel of contractors. Winning entries in the Dealer Design Awards were featured in the July 24, 2017 issue of *The ACHR News*, which is distributed nationally to over 33,000 HVACR contractors, wholesalers and other industry professionals.

“We are honored to be selected as this year’s recipient of the bronze award for our new configurable rooftop product,” said David Street, vice president of engineering and product management at Nortek Global HVAC. “This award reinforces the positive feedback we have received from contractors.”

The Mammoth R7TQ fits directly into popular, existing roof curbs without a curb adapter. This eliminates delays and saves installation time. Even the gas and electric connections are in the same location as many older units – no service reroutes required.
